To: Mr. Parker Wang

Sub: Recognition Letter for Jereh Cuttings Re-injection Service

Dear Mr. Parker Wang

I am glad to pass on my compliments to you, your company and your staff for a job well done on our recent 4PST&6PST drilling program.

I am also impressed with the level of professionalism exhibited by your staff and the thoroughness of their preparation and planning.

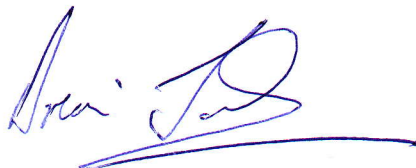

Your crew went about their job with such efficiency that they were able to build the Cutting Re-injection equipment and get it installed on the drilling rig in an extremely short time frame. The equipment performed flawlessly and we were impressed with the excellent performance of the cutting re-injection and brine water Injection.

Through their teamwork, your crews have built a good co-operation with all the other drilling and completion service teams and the Jereh CRI daily reports allowed us to monitor Jereh's performance and to ensure the time window given to your team to install and operate the equipment was met as planned. The good planning combined with the daily reports ensured that your operations did not cause any downtime to the EDC drilling operation.

Finally, I would like to add that the Jereh crews performed their work with no Safety Incidences. It shows that your crews are well trained not only with the job at hand but also in how to work safely. This is very important to us.

Brian Jobson
